NEW SMART-Line
control consoles

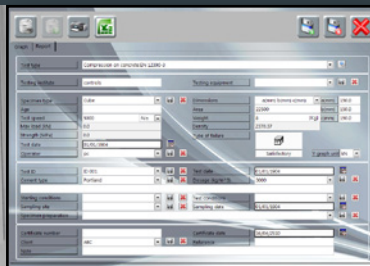

offer **MORE...**

SMART-Line

Discover the **Advantages!**

- **Flexibility** - The wide range covers many applications
- **Modularity** - Expandable up to 3 frames, controllable either by display or PC, several programmable test modules
- **Technology** - Efficient Energy Saving solutions, powerful double-stage hydraulic, advanced electronics
- **Reliability** - CONTROLS' compression machines have been in use around the world for over 40 years. We know how!
- **Precision** - Top quality of components ensures constant accuracy of results
- **Productivity** - Up to 40 tests per hour
- **Functionality** - Stylish design with particular attention to the ergonomic interaction with the operator
- **Safety** - Conformity to international regulations and Standards

AUTOMAX PILOT DIGIMAX

SMART-Line control consoles for Hydraulic testing frames

**CUSTOMER'S VALUE
DRIVES THE INNOVATION**

Adopting the innovative
CVI TECH concept which leads
CONTROLS' development strategy,
the new consoles feature:

- > **Efficient Technology**
- > **Intuitive and Smart Software**
- > **Functional and Industrial Design**
- > **Modular Expandability**

design

PILOT SMART-Line and AUTOMAX SMART-Line

New SMART-Line consoles for
AUTOMATIC control of hydraulic
compression and flexure testing
frames from 15 to 5000 kN.

Main features:

- > Automatic compression and flexure
test execution
- > Adopt the latest ES Energy Saving
technologies for reduction of power
and silent operation
- > Double stage hydraulic pump with
rapid approach and precise oil flow
control allowing high throughput of
accurate tests (up to 40 samples
per hour)

Automatic

PILOT + compression frame

PILOT + compression and flexure frames

Automatic plus

- > Soft platen-to-specimen contact and smooth load rate control from the very beginning of the ramp
- > Equipped with advanced electronics ensuring superior precision, high stability and effective resolution
- > Optional control of a second frame
- > Optional internal graphic printer including Load-Time plot
- > Connect to laboratory network via LAN port
- > Compatible with the new intuitive and smart DATA MANAGER software, very easy to use, complete with many functions, totally flexible, open to network communications
- > Dual user interface display and PC
- > Allow remote verification of settings and performances for easy debugging of unexpected malfunctions

AUTOMAX SMART-Line

Additional performances:

• PC control option

Double user interface based on display and PC. When connected to a PC, the system is fully computerized and controlled by the Data Manager software

• Fully automatic test cycle

The complete test cycle with closed loop digital feedback is automatically performed by simply pressing the start button. The load-time graph and the actual load rate are displayed in real time during the test. Correct test execution according to the selected Standard, is continuously and automatically controlled.

• Third frame control option

AUTOMAX can be upgraded for the non simultaneous control of a third frame as, for example, flexure testing frame and cement compression frame. Active frame selection is made via the display/software.

semi Automatic

DIGIMAX SMART-Line

New SMART-Line console for semi-automatic control of hydraulic compression and flexure frame from 15 to 5000 kN.

Main features:

- > Double stage hydraulic pump with rapid approach and precise oil flow control allowing high throughput of accurate tests (up to 40 samples per hour)
- > Soft platen-to-specimen contact and smooth load rate control
- > Equipped with advanced electronics ensuring superior precision, high stability and effective resolution
- > Optional control of a second frame
- > Optional internal graphic printer including Load-Time plot
- > Connect to laboratory network via LAN port
- > Compatible with the new intuitive and smart DATA MANAGER software

DATA MANAGER PC Software

The **DATA MANAGER PC Software (cod.82-SW/DM)** allows **remote control** of the AUTOMAX SMART-Line console and the **real time acquisition and management of test data** of AUTOMAX, PILOT and DIGIMAX SMART-Line.

Readings are displayed both as graphical and numerical format and stress vs. time diagram is plotted in real time. The conformity to Standards is easily proved and certified. Allows remote verification of unexpected malfunctions.

Standards:

UNI EN 196-1, UNI EN 1338,

UNI EN 1339, UNI EN 1340,

UNI EN 12390-3, UNI EN 12390-4,

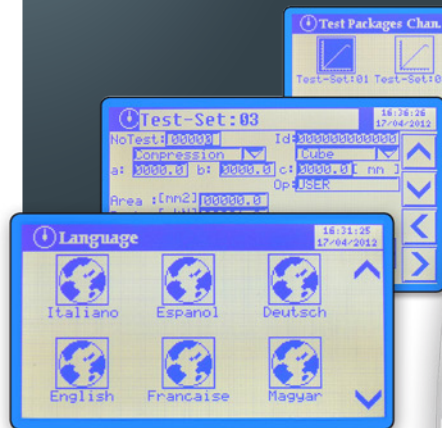

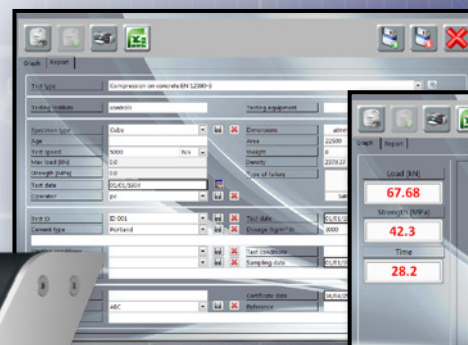

UNI EN 12390-5, UNI EN 12390-6,

and many others for cement, mortar, concrete, masonry, blocks and similar construction materials.

ASTM C39, ASTM C78,

ASTM C109, ASTM C239,

ASTM C348, ASTM C496

Reliable PC connection via LAN port

PILOT SMART-Line AUTOMAX SMART-Line

Ordering information

- **50-C10C02 PILOT** Smart-Line stand-alone control console.

230 V, 50-60 Hz, 1 ph.

Note: for 110 V, 60 Hz, select 50-C10C04

- **50-C10D02 AUTOMAX** Smart-Line stand-alone control console.

230 V, 50-60 Hz, 1 ph.

Note: for 110 V, 60 Hz, select 50-C10D04

Upgrading options

- **50-C10C/2F** Upgrading of **PILOT** with a second frame connection

- **50-C10D/3F** Upgrading of **AUTOMAX** with a third frame connection

Note: upgrading options shall be factory installed

DIGIMAX SMART-Line

Ordering information

- **50-C10B02 DIGIMAX** Smart-Line stand-alone control console.

230 V, 50 Hz, 1 ph.

Note: for 110 V, 60 Hz, select 50-C10B04; for 220V, 60Hz, select 50-C10B03

Upgrading options

- **50-C10B/2F** Upgrading of **DIGIMAX** with a second frame connection

Note: upgrading options shall be factory installed

Upgrading options and accessories for all SMART-Line consoles

- **50-C10/PR** Upgrading of **PILOT**, **AUTOMAX** and **DIGIMAX** with a serial printer incorporated in the control panel
- **82-SW/DM DATA MANAGER PC software**, for remote control of the system (**AUTOMAX** only), real time data acquisition and management of test data (**AUTOMAX**, **PILOT** and **DIGIMAX**)
